

ABSTRACT OF THE DISCLOSURE

The differential includes a differential housing (7A, 7B). A torque transmission member (5A, 5B) is supported to a differential housing (7A, 7B) for rotating relative to the differential housing. A clutch system (13A, 13B) is configured to interconnect between the torque transmission member (5A, 5B) and the differential housing (7A, 7B) for transmitting a drive torque therebetween.
